Project Abstract

(A summary of the project is written in English with a maximum of one page)

PAVANE is an online platform that offers clothing Brands an opportunity to showcase their products. Also, Customers benefit from the wide range of items available on the platform. There are two main features that both Brands and Customers benefit from, which are, the presence of a Recommendation System that suggests items to customers based on their preferences, and the availability of a 3D space environment that offers a unique experience in viewing the items. The main strategy of PAVANE is increasing the consumption rate of the customers.
